3D Metal Build Plate Removal

Twin-pillar band sawing machines' high accuracy makes them suitable for build plate removal on 3D printed metal parts manufactured using direct metal laser sintering (DMLS) technology.

With a cutting speed of up to **1000m/min.**, any 3D metal can be separated with ease and precision.

The intuitive **semi-automatic control panel** gives you total control over all machine functions.

Bel Air is a System Integrator, and all equipment can be modified or adapted to fit Cellular or JIT manufacturing platforms.
